

Ear Cleaner

Your pet's L-shaped ear canals make it hard for debris to exit—and easy for bacteria and fungi to grow, especially if the ears are moist—but this cleaner can help. Please don't use any narrow pointy tools to clean the inner ear, however, as they can rupture the eardrum. Also be aware that scratching, rubbing, redness, tilting the head in one direction, discharge, or odor can be signs of inflammation or a serious infection. Take your pet to the veterinarian if you notice any of these behaviors.

Yields approximately $\frac{2}{3}$ cup

$\frac{1}{3}$ cup witch hazel
3 tablespoons hydrogen peroxide
1 tablespoon apple cider vinegar
1 tablespoon colloidal silver

1. Thoroughly mix ingredients in a bowl.
2. Pour over cotton rounds in a clean, dry container with a tight lid. Allow the liquid to fully saturate all the rounds.
3. Use as many rounds as needed to clean ears.
4. Use a dry cotton round when done to dry ear canal.
5. Store in a cool, dry place and make a fresh batch every week.
