

Ant Spray

Got ants, and they're not ant farm pets? If you choose, you can include patchouli oil in this spray, which is more than 80 percent effective at repelling three different species of urban ants!

2 cups vinegar
(either white or apple cider vinegar will work)

1 cup water

1 tablespoon clear dish soap

15–20 drops essential oil
(peppermint, patchouli, and/or cedarwood)

1. Mix all ingredients together and pour into a spray bottle.
2. Shake before using.
