

All-Purpose Cleaner

Castile soaps are made from biodegradable nut- or plant-based oils (like coconut, hemp, almond, and walnut oil), and while they contain lye (it helps create suds), lye is entirely safe when used in soaps. We would never recommend you let your pet lick or ingest lye-based soap, but if they come into contact with it, they will *not* be poisoned.

Yields approximately 1½ cups

3 drops castile soap

1 cup filtered water

½ cup rubbing alcohol (70 percent)

Optional: 2–3 drops bergamot or
lemon essential oil

Mix ingredients together and add to a spray bottle.
