

Probiotic Rinse for Itchy Pets

This rinse is a great solution for itchy, irritated pet skin. If the problem doesn't clear up, or if your pet is in distress, always see your veterinarian, as itchy skin may be a sign of an underlying condition.

Yields approximately 3 cups

½ cup plain kombucha tea
1 cup green tea
1 cup peppermint tea
½ cup witch hazel
½ tablespoon colostrum powder
1 teaspoon probiotic powder
(spore-forming/soil-based probiotic powder is best)

1. Combine ingredients in a bowl, mixing well. Or put mixture into a spray bottle.
2. Pour or spray over your pet from the neck down. Avoid the eyes.
3. Rub into skin and towel dry. Do not rinse.
